Oracle Financial Services Software Limited — Associate Software Engineer

Role Category: SDE

Bengaluru / Mumbai, India · Full-Time · ₹5,50,000 CTC Annual performance bonus based on individual and team performance

Role Overview

Join the team building and maintaining enterprise-grade banking and financial services products such as FLEXCUBE and OBDX, used by banks globally. You'll work across development, customization, and support in an Agile environment.

Key Responsibilities

Develop, customize, and maintain modules within our banking product suite

Write and debug code, and interact directly with relational databases

Perform unit testing and collaborate closely with QA

Participate in Agile ceremonies and coordinate with product teams

Document your work clearly for future maintainers

What We're Looking For

Solid programming fundamentals — able to read and predict the output of code, and solve basic string/array manipulation problems confidently

Practical SQL knowledge — correct SELECT/WHERE syntax, understanding of DELETE vs. TRUNCATE, and comfort writing simple queries against a relational schema

Core data structures knowledge — arrays vs. linked lists, when to use a stack or a queue, and basic algorithmic problem-solving

Object-oriented programming fundamentals — inheritance, polymorphism, abstract classes vs. interfaces, explained with real examples

Operating systems basics — what a process is, fundamentals of multithreading and memory management

Strong quantitative aptitude — time-and-work, ratios, percentages, and logical/seating-arrangement style reasoning

Clear communication and a collaborative attitude — comfortable explaining your final-year project and working under deadline pressure

Awareness of the software development lifecycle and the difference between Agile and Waterfall, and why documentation matters

Nice to Have

Coursework or a project in banking/financial systems; willingness to work in shifts or from client locations.

Benefits

Health insurance, provident fund, gratuity, learning and certification programs, subsidized meals.
