Karthik Subramaniam

Data-leaning analyst — strong fit for Data Scientist / Data Analyst roles, weaker fit for pure SWE roles

Education

B.Tech, Computer Science and Engineering, Class of 2026 — CGPA 8.2 / 10

Technical Skills

SQL, Python (pandas, scikit-learn), Power BI, Statistics, A/B testing basics, Excel, basic Java

Projects

Built an end-to-end churn-prediction pipeline (SQL extraction → feature engineering → logistic regression model) on a public e-commerce dataset

Designed a normalized schema and dashboard for a college event-management system, including anomaly detection on registration spikes

Ran and analyzed an A/B test simulation comparing two onboarding flows, presenting results to a non-technical audience

Hackathons / Internships

Data Analytics intern at a fintech startup — built two recurring dashboards used by the growth team

Runner-up, inter-college data visualization competition

Certifications

Google Data Analytics Certificate

Achievements

Published a short analysis write-up on a public dataset, featured in a college newsletter

Preferred Roles

Data Analyst, Data Scientist
